Projects

BTR Mall — Multi-Vendor E-Commerce Platform (In Progress)

Built a content-focused Developing a scalable multi-vendor E-Commerce platform inspired by modern online marketplaces. The platform enables vendors to manage stores, products, orders, and inventory while providing customers with a seamless shopping experience across web and mobile applications. The system is designed using a modular architecture with support for background task processing, caching, containerized deployment, and RESTful APIs.

Key features

- Multi-vendor marketplace with seller onboarding and management
- Product catalog with categories, variants, and inventory tracking
- Shopping cart and order management system
- Secure user authentication and authorization
- RESTful APIs for web and mobile applications
- Real-time notifications and background task processing
- Product reviews and ratings
- Discount, coupon, and promotion management
- Shipping and delivery workflow management
- Scalable caching layer for improved performance
- Containerized development and deployment environment
- Admin dashboard for platform monitoring and management

BTR Mall Technologies

Backend: Django, Django REST Framework (DRF)
Database: PostgreSQL
Caching & Message Broker: Redis
Background Processing: Celery
Frontend: React.js
Mobile Application: React Native
Containerization: Docker, Docker Compose
Authentication: JWT Authentication
API Development: RESTful APIs
Version Control: Git, GitHub
Environment Management: Environment Variables (.env)
Programming Language: Python, JavaScript

Goal Line Report—Stories & Posts Platform

Built a content-focused Django application that supports Stories and Posts with a full editorial workflow and deep Django Admin customization. The app manages multiple user roles (Chief Editor, Editor, End-user) with role-based permissions and content moderation. Background tasks (scheduling, notifications) are handled with Celery and the admin is extended to provide a production-ready editorial toolset.

Key features

- **Content types:** Stories with categories, tags, attachments and rich text editing.
- **Editorial workflow:** draft → review → approve → publish.
- **Multi-role access:** Chief Editor, Editor, End-user (and Django superusers) with scoped permissions.
- **Moderation & audit:** moderation queue, in-admin review.
- **Subscription system:** End-users can subscribe to authors or categories, and when a new Story is published, an email notification is automatically sent to all subscribers.
- **Background Jobs :** Celery for scheduled publishing, email notifications, and optional real-time updates.

Editorial roles & responsibilities

- **Chief Editor** — full editorial control: approve/publish, manage editors, view editorial analytics, revert versions.
- **Editor** — review, request changes, edit and schedule content, moderate comments
- **End-user** — browse, comment, like, save/bookmark content.

Goal Line Report Technologies

- Frameworks: Django
- Database: PostgreSQL
- Background jobs: Celery
- Frontend / Admin UI: Jazzmin,HTML5, CSS3, Bootstrap 5, jQuery, CKEditor
- Auth & Permissions: Django Permissions and Groups
- Versioning : Git,Github

ElecMech — Engineering Services Website

Developed a professional engineering services website for showcasing company profile, electronics/mechanical solutions, and client inquiry handling. The system is designed with a focus on performance, SEO optimization, and responsive user experience for industrial clients.

Key features

- Company services and portfolio showcase
- Responsive UI for desktop, tablet, and mobile
- Contact and inquiry system with email notifications
- SEO optimized structure for better search visibility
- Clean and structured UI for corporate presentation
- Fast loading and optimized performance

Elec Mech Technologies

- Django
- Python
- MariaDB (Database)
- HTML5, CSS3
- Bootstrap
- JavaScript
- SMTP Email Integration (Contact form notifications)

Technical Skill

BackEnd Development

Python
Django
REST Framework (DRF)
RESTful API Development

Authentication & Authorization

Authentication
Role-Based Access Control (RBAC)
Permissions Management
JWT Authentication

SEO & Opmimization

Django Sitemap Framework
SEO Best Practices

Frontend Development
