PROFILE

Experienced Django and Python Developer with a strong background in both front and backend development. Proficient in utilizing Django framework for building robust web applications. Skilled in web scraping techniques, leveraging tools like Scrapy for data extraction and analysis. Additionally, adept at implementing and customizing Django CMS, such as Wagtail, for content management needs. Passionate about delivering high-quality solutions and contributing effectively to team success.

PROFESSIONAL EXPERIENCE

02/2023 – present
Lahore

Python/Django Developer

Organization

TheTechFury

Duration

February 2023 to Continue

Projects

API Development for OpenAI based Chatbot

In this project, we developed APIs leveraging Django Rest framework (DRF) and Django Channels to facilitate a clock-in and clock-out system to track out the activities of employees. Additionally, we integrated OpenAI's natural language processing capabilities to enhance user interactions and provide intelligent assistance within the system. Besides this user can also send prompt through sms.

Technologies

Frameworks: Django, Django Rest

Framework (DRF), Django Channels

Database: MongoDB

SMS: Twilio

Real-time Communication: WebSocket

Natural Language Processing:

OpenAI API

Documentation: Swagger/OpenAPI

TechFury Website Development using Django Wagtail

Developed a comprehensive website for a tech company leveraging

Wagtail CMS, enabling users to explore company details and engage with blog content seamlessly.

Technologies

Frameworks: Django, Wagtail

Database: PostgreSQL

Front End: HTML, CSS, Bootstrap and JQuery

Motor Testing Software

Developed motor performance testing software. Enables

parameterized tests by getting data from multiple sensors from user and we can also imports data from MDB files, and provides interactive chart visualization for effective analysis and customizable pdf report generation. Streamlines motor performance analysis with intuitive tools and professional report capabilities.

Technologies

Frameworks: Django

Front End : HTML, CSS, Bootstrap and JQuery

Libraries : Wkhtml,Chart.js

USA Healthcare and Community Service Providers Database: Connecting Communities for Well-being

- Our scrapy project meticulously gathers information on healthcare and community service providers across various states in the USA. From medical facilities to community organizations, our dataset offers comprehensive insights into the landscape of support available to residents. Dive into detailed profiles, including contact information, services offered, and geographical locations, empowering users to connect with essential resources

Technologies

Framework : scrapy
