

Muhammad Nouman

Python Backend Engineer

✉ nomannisar769@gmail.com | ☎ 03248699647 | 📍 Farooqabad District Sheikhpura

PROFILE

Backend Engineer specializing in Python, Django, Django REST Framework, PostgreSQL, Redis, Celery, Docker, and REST API development. Experienced in designing scalable backend systems, authentication, caching, asynchronous task processing, and containerized deployments. Passionate about building production-ready web applications and continuously learning cloud and DevOps technologies.

PROFESSIONAL EXPERIENCE

05/2025 – present
Lahore

Python/Django Developer

TheTechFury

Duration

May 2025 to Continue

Projects

BTR Mall — Multi-Vendor E-Commerce Platform (In Progress)

Built a content-focused Developing a scalable multi-vendor e-commerce platform inspired by modern marketplaces such as Daraz and Amazon. Designed and implemented a modular backend architecture using Python, Django, Django REST Framework, PostgreSQL, Redis, Celery, and Docker. Built secure RESTful APIs with JWT authentication, integrated background task processing, caching, inventory management, order processing, and containerized deployment to deliver a scalable, maintainable, and production-ready backend system.

Live Demo:

Coming Soon

Key features

- **Multi-vendor marketplace with seller onboarding and store management**
- **Product catalog with categories, brands, variants, attributes, and inventory management**
- **Shopping cart, wishlist, and secure checkout workflow**
- **Order, shipment, and delivery management system**
- **Secure JWT authentication, authorization, and role-based access control (RBAC)**
- **RESTful APIs for web and mobile applications**
- **Product reviews, ratings, and customer feedback system**
- **Discount, coupon, and promotional campaign management**
- **Background task processing using Celery**
- **Redis-based caching for improved application performance**
- **Email and notification system**
- **Dockerized development and deployment environment**
- **Responsive admin dashboard for platform monitoring and management**
- **API documentation using Swagger/OpenAPI**

BTR Mall Technologies

- **Programming Languages:** Python, JavaScript
- **Backend:** Django, Django REST Framework (DRF), Django Signals
- **Frontend:** React
- **Mobile Application:** React Native
- **Database:** PostgreSQL
- **Caching & Message Broker:** Redis
- **Background Processing:** Celery
- **Authentication & Authorization:** JWT Authentication, Role-Based Access Control (RBAC)
- **API Development:** RESTful APIs, Swagger / OpenAPI
- **Web Server:** Gunicorn, Nginx
- **Containerization:** Docker, Docker Compose
- **Version Control:** Git, GitHub
- **Environment Management:** Environment Variables (.env)
- **Operating System:** Linux (Ubuntu)
- **Development Tools:** Postman, VS Code, PyCharm

Goal Line Report—Stories & Posts Platform

Built a content-focused Developed a content management platform for publishing stories and posts with a complete editorial workflow. Designed a role-based content management system that enables Chief Editors, Editors, and End-users to collaborate efficiently. Implemented background task processing with Celery, advanced Django Admin customization, and secure permission management to deliver a production-ready editorial platform..

Live Demo:

<https://goallinereport.com/>

Key features

- **Story and post management with categories, tags, attachments, and rich text editing**
- **Editorial workflow (Draft → Review → Approval → Published)**
- **Advanced Django Admin customization with Jazzmin**
- **Custom admin dashboards, filters, search, actions, and optimized admin workflows**
- **Role-based access control (Chief Editor, Editor, End-user)**
- **Content moderation and approval workflow**
- **Subscription system with automated email notifications**
- **Scheduled publishing using Celery**
- **Commenting, likes, and bookmarking**
- **Advanced Django Admin customization**
- **Editorial analytics and version management**
- **Secure authentication and permission management**

Editorial roles & responsibilities

Chief Editor

- Approve and publish content
- Manage editors and permissions
- View editorial analytics
- Restore previous versions

Editor

- Review and edit content
- Schedule publications
- Moderate comments
- Request revisions

End-user

- Read stories and posts
- Like, comment, and bookmark content
- Subscribe to authors and categories

Goal Line Report Technologies

- **Programming Language:** Python
- **Backend:** Django
- **Admin Dashboard:** Django Admin, Jazzmin, Django Admin Customization
- **Database:** PostgreSQL
- **Background Processing:** Celery
- **Frontend:** HTML5, CSS3, Bootstrap 5, jQuery
- **Rich Text Editor:** CKEditor
- **Admin Dashboard:** Django Admin, Jazzmin
- **Authentication & Authorization:** Django Authentication, Groups & Permissions
- **Version Control:** Git, GitHub
- **Operating System:** Linux (Ubuntu)

ElecMech — Engineering Services & Machinery Platform

Developed a professional engineering services and machinery showcase website for presenting company services, industrial solutions, and machinery products. The platform enables customers to browse products, submit inquiries, and place orders directly through WhatsApp while providing administrators with an email-based inquiry management system. The website is designed with a responsive user interface, SEO optimization, and high-performance architecture to deliver a seamless user experience across all devices.

Live Demo:

<https://elecmech.com.pk/>

Key features

- **Engineering** services and company profile showcase
- **Machinery** and industrial product catalog
- **Product details** with WhatsApp order integration
- **Contact and inquiry** management system
- **Automated email** notification system
- **Company projects** and portfolio showcase
- **Responsive design** for desktop, tablet, and mobile devices
- **SEO-optimized** pages for improved search visibility
- **Fast-loading** and optimized user experience
- **Professional** corporate user interface

Elec Mech Technologies

- **Programming Language:** Python, JavaScript
- **Backend:** Django
- **Frontend:** HTML5, CSS3, Bootstrap 5, JavaScript
- **Database:** Mariadb
- **Email Services:** SMTP
- **Third-Party Integration:** WhatsApp Click-to-Chat
- **Version Control:** Git, GitHub
- **Operating System:** Linux (Ubuntu)
